HYDRANGEA PEEGEE (Hydrangea Paniculata Grandiflora)

This beautiful shrub with its large heads of showy bloom (some of the flowers are over 12 inches in size) are well known. The flowers do not appear until late Summer. The flower is white at first, then turns to pink, and make beautiful Winter bouquets. Very hardy. Height 4 to 6 feet.

BAILEY'S BEAUTIFUL FLOWERING CRABS

Everyone Loves Spring and Flowering Crabs

BECHTEL'S DOUBLE FLOWERING CRAB. Beautiful, fragrant, double pink flowers; each flower is like a pink Camellia; the ideal tree for small yards.

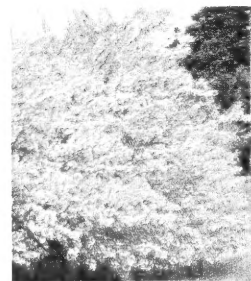

CRAB, HOPA. Beautiful, deep red blossoms. Many consider it the most beautiful of the Flowering Crabs. The foliage is dark green with a red cast. The small red fruits remain on the tree until Autumn. Spreads to 15 feet. Height 20 feet.

CRAB, DOLGO (The Beautiful White Flowering Crab). It is equally attractive when in flower or when laden with its abundant, brilliant red fruits; fruit is very desirable for jelly.

Plant Bailey's Northern Grown APPLE TREES

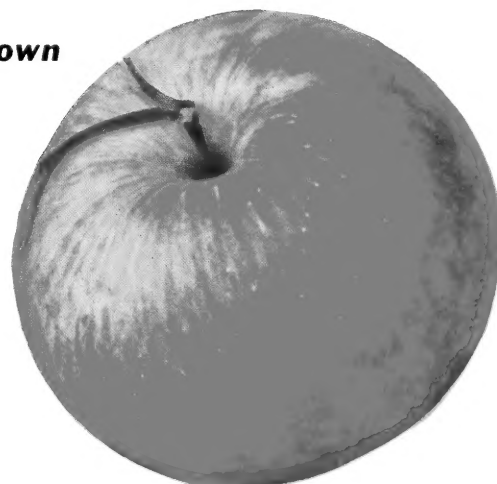

Bailey's Apple trees are three years old and the varieties offered are the best suited to conditions in the North Central States. The trees are grafted on roots grown especially to give you the hardy stock that is needed in this region. Experience has shown that they will withstand severe cold and extended drouth. They are very productive.

Turn to Inside Pages for All Prices on Fruit Trees, and A Complete List of APPLE, CHERRY, PEAR and PLUM

HYDRANGEA Arborescens Grandiflora

The large clusters of white flowers of this shrub are somewhat more flattened than those of Peegee. It blooms profusely in July and early August. It is useful in borders and low foundation plantings. It is hardy and well adapted to shady locations. Height 4 feet, spread 4 feet.

Cl. Break O'Day (Pat. No. 696). A sub-zero Brownell Rose. Orange to apricot is the color. \$2.00 each.

Cl. New Dawn. This is truly a beautiful pink everblooming Rose. \$1.50 each; 3 or more, \$1.30 each.

Cl. Orange Everglow. Another beautiful new, sub-zero Brownell Rose. Color, orange copper. \$2.00 each.

Climbing Blaze (Everblooming)

Bailey's Selected Grade of **EVERBLOOMING ROSES**

Christopher Stone. Scarlet—a beautiful Rose. One of the choicest reds. \$1.50 each; 3 or more, \$1.30 each.

Countess Vandal. A vigorous, prolific bloomer. Pink and yellow shades. \$1.50 each; 3 or more, \$1.30 each.

Condesa de Sastago. Vermilion and yellow. Fragrant, profuse bloomer. Good grower. \$1.50 each; 3 or more, \$1.30 each.

Editor McFarland. Deep pink. Vigorous, healthy, upright plants are free with beautifully modeled buds and fragrant blooms of deep pink on strong, wiry stems. \$1.50 each; 3 or more, \$1.30 each.

Etoile de Hollande. Velvety, dark crimson flowers with a true Rose perfume; fine form, long cutting stems and a vigorous grower. \$1.50 each; 3 or more, \$1.30 each.

Improved Lafayette. Bright red, hardy Floribunda. \$1.50 each; 3 or more, \$1.30 each.

McGredy's Ivory. A creamy white Rose that starts with long pointed buds on extra long stems. Has an intense damask fragrance. \$1.50 each; 3 or more, \$1.30 each.

McGredy's Scarlet. Excellent form, grows vigorously, and produces an abundance of scarlet blooms. \$1.50 each; 3 or more, \$1.30 each.

McGredy's Yellow. Exquisite buds and flowers of bright buttercup-yellow. Very sturdy plant habits. \$1.50 each; 3 or more, \$1.30 each.

Picture. Velvety clear rose pink with understones of salmon. Very double. \$1.50 each; 3 or more, \$1.30 each.

President H. Hoover. Large, multicolored blooms of yellow, cerise, and flame, deliciously fragrant. Magnificent grower. \$1.50 each; 3 or more, \$1.30 each.

Talisman. Exquisitely formed buds of orange, scarlet, and gold are borne on long stems. Free bearing and very fragrant. \$1.50 each; 3 or more, \$1.30 each.

Plant FLOWERING SHRUBS Early This Spring for Next Summer's Bloom

ALMOND, Double Flowering. Double, rose-like pink flowers cover the branches in early May. It is not recommended for climates similar to northern Minnesota. Height 4 feet.

BARBERRY, Redleaf. Deep red leaves that last throughout the Summer. The color is best when the shrub is grown in full sunlight. It is also used as a hedge. Height 2 to 3 feet.

BARBERRY, Thunberg. This low shrub is useful in foundation plantings. The bright green leaves turn a brilliant red in Autumn, attractive red berries in the Fall and Winter. It is hardy and will tolerate shade.

BUCKTHORN, Common. If a heavy, impenetrable barrier is desired, this shrub will meet your needs. It may be trimmed as a formal hedge; 3 to 8 feet. It is not recommended for rural areas because it is host to oat rust.

COTONEASTER, Peking. The leaves are dark and glossy. It is completely hardy and thrives on poor, rather dry soils. Height 6 to 8 feet. A very desirable hedge.

CRANBERRYBUSH, Highbush. Rich colored foliage, white blossoms in July followed by bright red fruit in September. Height 7 to 8 feet.

CURRENT, Alpine. Here is an especially useful landscape shrub, upright and compact. The leaves are small and dark green. Will grow in a variety of soils and partial shade. It is thoroughly hardy. Height 4 feet, spread 3 feet. The outstanding dwarf hedge.

DOGWOOD, Baileyi. Bright red twigged. Height 6 to 8 feet.

DOGWOOD, Variegated. Bright red twigged, leaves green and white striped. Height 5 to 6 feet.

ELDER, Golden. Bright golden yellow leaves mark this shrub throughout the Summer. It is hardy and rapid growing. Height 6 to 8 feet.

EUONYMUS alatus (Winged Euonymus). Yellow flowers, May-June. Interesting corky bark. Leaves turning brilliant crimson in Autumn. Height 10 to 12 feet.

HONEYSUCKLE, Tartarian. This shrub is excellent for screens, backgrounds and specimens. The flowers are pink to white, appearing late in May. Bright red berries offer color in Autumn. The shrub does fairly well in heavy shade. Height 8 to 10 feet.

HONEYSUCKLE, Zabel. Pictured on Back Page.

HYDRANGEA, Peegee. Pictured on Front Page.

HYDRANGEA, Snowhill. Pictured on Inside Page.

FRENCH LILAC. Pictured on Inside Page.

LILAC, Purple. Old-fashioned old favorite.

LILAC, Persian. Beautiful lavender flowers appear late in May. It is hardy. Height 6 to 8 feet.

MOCKORANGE, Golden. This compact shrub has brilliant yellow foliage. A mass of white flowers in May and June. It seldom grows over 4 feet tall; useful in borders, specimen and foundation plantings.

MOCKORANGE (Philadelphus Virginal). Pictured and described on Inside Page.

NINEBARK, Dwarf. Heavy, dark green foliage. Height 3 to 5 feet.

PLUM, Cistena. The showy, rich, purplish foliage is probably the most striking of the red-leaved varieties. The best color obtained in full sunlight. Height 4 to 5 feet.

PLUM, Double Flowering (Prunus Triloba). This fine shrub is covered with pink, rose-like flowers in April and May. Known as the "Rose Tree of China." Height 6 to 8 feet.

POTENTILLA fruticosa. Dwarf growing, foliage fine textured, bright yellow flowers June 'till late Fall. Height 2 to 3 feet.

PRUNUS, Newport. A beautiful specimen tree for your yard for color throughout the Spring, Summer and Fall.

SIBERIAN PEA TREE (Caragana Arborescens). It is often used as a tall, informal, flowering hedge. It may or may not be trimmed. It is thoroughly hardy.

SNOWBALL. This shrub has stood up well through the years. Its large, round clusters of white flowers are a familiar sight in May and June.

SNOWBERRY (Red Snowberry). A very fast growing shrub commonly called Coralberry. It does very well in the shade. The flowers are coral-red.

SNOWBERRY (White Snowberry). Clusters of large, pure white berries are of striking attractiveness from September through Winter. It is very hardy and does well in fairly heavy shade.

SPIRAEA, Anthony Waterer. Masses of crimson flowers appear in July and continue irregularly throughout the Summer. It is hardy and does well in fairly heavy shade. Height 3 feet.

SPIRAEA froebeli. Description on Inside Page.

SPIRAEA vanhouttei. Many admirers know this shrub as "Bridalwreath." The branches are covered with white blossoms in Midspring. It is useful in shrub borders, foundation plantings and hedges. It is thoroughly hardy. Height 6 to 8 feet.

TAMARIX, Kashgar. Feathery, bluish gray foliage gives this shrub an unusual airy charm. It bears long panicles of bright pink flowers in July and August. Height 12 to 15 feet.

PLANT VINES FOR BEAUTY

BITTERSWEET. For Winter bouquets. Several vines planted close together will fruit more heavily than one.

IVY, Boston. The small, dark green leaves are held close to the wall to form a tight screen. Leaves turn a fine shade of red in Autumn.

IVY, Engelmann. This useful Climber is a well known vine. The foliage turns a bright scarlet in the Fall. The vine is hardy, vigorous and fast growing.

HONEYSUCKLE, Scarlet Trumpet. A very popular climbing vine. Dark green foliage and scarlet flowers throughout the Summer.

HONEYSUCKLE, Everblooming. A delightful new vine, fragrant, flame-coral trumpets lined with creamy gold. Blooms abundantly from May until frost. It can be clipped to form a neat hedge, a striking specimen shrub, or allowed to grow naturally to climb a trellis.

Description of All Balled and Burlapped Evergreens Priced on Color Pages

SAVIN JUNIPER

Heavy branching gives it compactness, and the spreading habit of growth makes it vase-like in outline. It is usually about as tall as it is broad, sometimes reaching a height of 3 feet and diameter of 4 feet. It is widely used in foundation plantings.

PFITZER JUNIPER

Probably no Juniper is more widely planted than this low, broad evergreen. It is hardy and does well in a wide variety of soils and exposures. It tolerates partial shade, and also does well in full sunlight. It may reach 3 to 4 feet in height and 6 or more feet in diameter; however, it is readily trimmed to desired size. The color is predominantly green, although a tinge of blue may be evident. It is extensively used in foundation plantings.

PINE

Ponderosa Pine. The Ponderosa Pine is generally accepted as the best large Pine for use in landscape plantings. It sometimes reaches a height of about 60 feet and a diameter of 40 to 50 feet. It is fast growing and adapts itself to a wide variety of conditions.

Mugho Pine. Here is a low growing dwarf Pine. It is compact and round in shape. The size can be controlled by trimming. The foliage is deep green. It is hardy and will tolerate some shade.

SPRUCE

Black Hills Spruce. A robust appearance is characteristic of this handsome Spruce. It is symmetrical, compact and bushy in habit. It is very hardy and is highly resistant to drought. It will do well on a wide variety of soils. A bluish tinge may be seen in the deep green of the foliage. It may reach a height of 40 to 50 feet, averaging about 1 foot a year in new growth.

Colorado Blue Spruce. This is probably the most popular ornamental Spruce. It has a symmetrical, conical outline. It is hardy and drought resistant. It grows well in a wide variety of conditions from dry, sandy to rich, moist situations. The color ranges from green to powdery blue. Not all of the trees have the striking blue sheen. The greens and the blues are separated in the price list. The trees may reach a height of 40 feet and a spread of 20 to 25 feet.

Colorado Blue Spruce

ARBORVITAE

American Arborvitae. Everyone is familiar with the flat, lacy foliage of the American Arborvitae. It is one of our native trees. It naturally grows in a pyramidal shape. It may attain a height of 40 feet and a spread of 8 to 10 feet, but it can be limited in size by trimming. It grows best in moist locations.

Globe Arborvitae. This dwarf of the American Arborvitae grows to about 3 feet in diameter. The round form is maintained naturally and does not require trimming. Like the American Arborvitae, it grows best in moist locations.

Pyramidal Arborvitae. Here is an Arborvitae that was selected because of its rich green color and slender, erect form. Old trees may reach a height of 25 feet; the height can be limited and the growth made more compact by trimming. This tree is undoubtedly the most widely planted Arborvitae used in landscape planting.

Siberian Arborvitae. Because of its extreme hardness, this Arborvitae was named "Siberian." The dark green foliage is thicker and heavier than those of its parent, the American Arborvitae. It is dense in growth and conical in outline. It maintains its normal shape well, but can be trimmed to any desired form. If it is not trimmed it may reach a height of 10 feet.

JUNIPER

Juniper Dundee. Attractive coloring and compact, pyramidal habit of growth distinguish this widely planted variety of Red Cedar. The tips of the branches tend to stand upright. Throughout the Spring and Summer it is bluish green, but with the coming of frost it changes to a purplish plum color for Fall and Winter. It is very hardy.

Moffett Juniper. This is a popular variety of the true Silver Juniper. It is an upright evergreen with attractive light blue foliage. The new growth on the tips of the branches tends to be pendant. Like most Junipers, it can be trimmed or grown naturally. It is very hardy.

Pathfinder Juniper. It is believed that this evergreen has the most beautiful silvery blue coloring of all the varieties of the true Silver Juniper. The habit of growth is upright, with a somewhat broader and more bushy base than is found in other varieties of the true Silver. The tips of the branches are of fine texture and tend to be upright in habit. It is hardy.

Red Cedar. Beautiful green pyramidal tree. The ideal tree to use in foundation landscaping or as a specimen tree. It is very hardy, a native of the Midwest. They are adapted to our soil and temperature.

Silver Juniper. This Juniper has the form of the Red Cedar, but it does not grow as large, and has attractive silvery foliage. It is the parent of such beautiful grafted Junipers as the Chandler Blue Juniper, Moffett Juniper, Pathfinder Juniper and Welch Juniper.

Welch Juniper. This very handsome Juniper is one of the more recent grafts of the Silver Juniper. Its most attractive quality is the compact, narrow, upright habit of growth. The vertical position taken by the new growth emphasizes the upright form. It has a deeper blue-green color and a more compact growth than other grafted Silver Junipers. It has proven to be very hardy.

EVERGREENS for Home Gardeners!

GROW YOUR OWN ORNAMENTAL EVERGREENS

Garden enthusiasts are invited to share in the pleasure of growing Ornamental Evergreens for their own landscape plantings. Home gardeners everywhere have found it interesting and profitable to grow evergreens. An assortment of the smaller sizes of the more popular varieties can be planted in the garden. Upkeep is not a problem because the trees can be cultivated along with the other garden plants. They can be grown until suitable for planting in the permanent landscape.

PLANT A SHELTER BELT for WINTER PROTECTION

Bailey's grow their own evergreens. This is important. You can be sure the evergreens we grow are hardy.

Deciduous SHELTER BELT Stock

ASH, Green. Here is one of the most dependable shelter belt trees. More description given. *See Shade Trees.*

ELM, American. Everyone knows the American Elm. It is well suited to use in rows four to six. Hardy, long lived trees.

ELM, Chinese. For hardness this drought resistant, Siberian Elm is difficult to surpass. It is a remarkably fast growing Elm.

HONEYSUCKLE, Tartarian. The snow catch rows planted to this shrub. It is perfectly hardy. It has flowers in the Spring, bright red berries in Summer, branches in Winter. Height 10 to 12 feet.

MAPLE, Silver. Here is a quick growing Maple. More description given. *See Shade Trees.*

OLIVE, Russian. The serviceability and beauty of this tree make it most acceptable for snow catch purposes. It thrives under the most adverse conditions of soil and climate. It will develop a compact wall of attractive silvery foliage. The flowers are small but very fragrant. Height 25 feet.

POPLAR, Lombardy. Here is a suitable tree for planting in rows 3 and 5. It is quick growing and hardy. Height 60 feet.

PEA TREE, Siberian. Many people know this shrub as Caragana. It thrives in a wide variety of soil conditions; withstands drought and is perfectly hardy. It is exceptionally good for snow catch plantings. Height 12 to 15 feet.

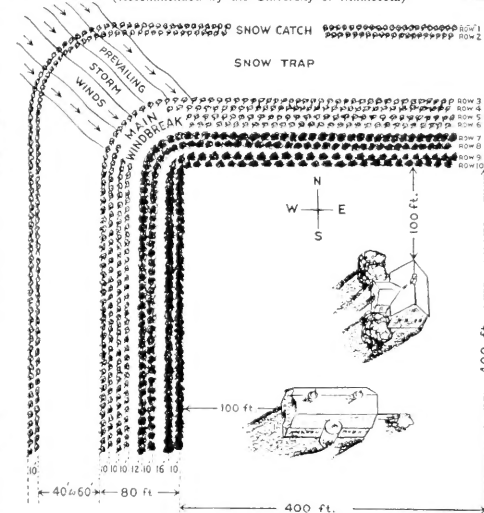

WILLOW, Golden. Colorful golden branches add to the usefulness of this Willow. It will grow under a variety of conditions but will thrive especially in wet soils. It is suitable for planting in rows 3 and 5 where quick growth is needed. Height 40 feet.

WILLOW, Laurel. For rapid development of a snow catch, plant this quick growing Willow. The large, shining leaves form an attractive foliage. They are dark green above, paler beneath. Height 20 to 25 feet.

WILLOW, Niobe Weeping. This quick growing tree is the best of the Weeping Willows. It may be used in rows three and five of the shelter belt. Height 40 feet.

STANDARD SHELTER BELT PLAN

(Recommended by the University of Minnesota)

Spacing

All trees and shrubs planted in the shelter belt should be staggered to fill up the gaps and thereby to more effectively check the wind. The spacing between the rows is shown in the plan above. The distances may be extended by 2 to 4 feet in the main windbreaks (rows 3 to 10) if space is available. The trees or shrubs used in the snow catch (rows 1 and 2) should be planted 4 feet apart in the row; all other trees should be planted 6 feet apart in the row. The trees in rows 3 and 5 may be cut for fuel or posts whenever they begin to crowd the more hardy, long-lived trees in rows 4 and 6.

SHELTER BELT EVERGREENS

JUNIPERS. Both the Red Cedar and the Silver Cedar are available for shelter belt plantings. *See descriptions under Evergreens.*

PINE, Jack. This fast growing Pine is very hardy and will thrive on soils too poor for other Pines. Height 50 feet.

PINE, Norway. A very fast grower desirable for group planting.

PINE, Ponderosa. Or "Bull Pine." It is probably the best Pine for heavy soils. Height 60 to 80 feet. Vigorous, drought resisting.

PINE, Scotch. The qualities of Scotch Pine are similar to the Ponderosa Pine. Needles are shorter and brighter green.

PINE, White. This Pine is excellent for shelter belt planting. It is easily transplanted, has long life and rapid growth. Height 70 to 80 feet.

SPRUCE, Black Hills. *See description, opposite page.*

SPRUCE, Colorado Blue. *See description, opposite page.*

SPRUCE, Norway. The rapid growth of this Spruce makes it a favorite shelter belt tree. Height 50 to 60 feet.

SPRUCE, White. Similar in appearance and characteristics to the Black Hills Spruce, but a little faster in growth.

ROSES FOR YOUR GARDEN

*Bailey's Select These 25 Old and New
Everblooming Favorites For Your Rose Garden*

Chrysler Imperial (Plant Pat. No. 1167). Pictured in color on inside page. \$2.75 each; 3 or more, \$2.40 each.

Crimson Glory (Plant Pat. No. 105). Rich crimson; beautifully formed buds, long stems, prolific in its bloom. \$1.50 each; 3 or more, \$1.30 each.

Diamond Jubilee (Plant Pat. No. 824). Double, high-centered flowers of glowing buff-orange, with a touch of gold at base of petals. A.A.R.S. Award for 1948. \$2.00 each; 3 or more, \$1.75 each.

Eclipse (Plant Pat. No. 172). Golden yellow. Distinctly different; buds that often exceed 2 inches in length. Open blooms are large, well formed. \$1.75 each; 3 or more, \$1.55 each.

Forty Niner (Plant Pat. No. 792). The colors are so bright and so startling in their contrast that it is hard to believe they could be present in the same flower. \$2.50 each; 3 or more, \$2.20 each.

Helen Traubel (Plant Pat. No. 1028). Because of its apricot-pink coloring and perfect flowers, fragrance, and vigorous plant, you can't help but like this 1952 winner. \$2.75 each; 3 or more, \$2.40 each.

Katherine T. Marshall (Plant Pat. No. 607). Large blooms of glowing pink. Fragrant, perfect form, long stems. Vigorous. A beautiful Rose. \$1.75 each; 3 or more, \$1.55 each.

FLORIBUNDA ROSES

For Quantity of Bloom—For Continuous Bloom—For Mass Planting—For Bouquets and Corsages

Floribunda Roses are hardy and long lived. They need comparatively little care, and they come in a wonderful range of colors.

Fashion (Plant Pat. No. 789). 1950 All-America winner. The color is unique and lovely, a blending of coral and gold with a warm overlay of apricot, a color entirely new in Roses. 2 to 2½ feet. Blooms continuously. \$2.00 each; 3 or more, \$1.75 each.

Frolic (Plant Pat. No. 1179). Another introduction for 1954. It's a Floribunda which covers itself with spray after spray of bright pink bloom. \$2.25 each; 3 or more, \$2.00 each.

Geranium Red (Plant Pat. No. 811). Flowers very double (50 petals). Strong Geranium fragrance, bright Geranium-red; cluster. \$1.75 each; 3 or more, \$1.55 each.

Goldilocks (Plant Pat. No. 672). Rich golden yellow; buds shaped like Hybrid Teas. Abundant bloom; a border of Goldilocks makes a striking display. Winner of the John Cook Medal. \$1.50 each; 3 or more, \$1.30 each.

Ma Perkins (Plant Pat. No. 1143). Introducing a sparkling new color and a rich and unusual fragrance to the Floribunda class, Ma Perkins won All-America honors for 1953. Each delightfully shaped. \$2.25 each; 3 or more, \$2.00 each.

Pinocchio (Plant Pat. No. 484). Throughout the season it is literally covered with immense clusters of perfect little Roses in shades of salmon flushed with gold. The plant grows 24 to 30 inches tall and requires no special care for splendid results. \$1.50 each; 3 or more, \$1.30 each.

Lowell Thomas (Plant Pat. No. 595). Canary-yellow, holds its color. A vigorous bloomer with beautiful bud. \$2.00 each; 3 or more, \$1.55 each.

Mirandy (Plant Pat. No. 632). The huge, 50-petaled, deep crimson flowers open slowly from buds. Aging flowers turn to a deep wine-red color. Very free blooming all season. \$2.25 each; 3 or more, \$2.00 each.

Mme. Marie Curie (Plant Pat. No. 727). Everyone who has planted this fine yellow Rose is amazed at its strong habit of growth and free flowering habit. \$1.75 each; 3 or more, \$1.55 each.

Nocturne (Plant Pat. No. 713). Streamlined buds and glorious flowers of cardinal red, with darker shadings. \$2.00 each; 3 or more, \$1.75 each.

Peace (Plant Pat. No. 591). No Rose selection is complete without this very satisfactory grower. Enormous flowers with strong stems. One of the very best. \$2.50 each; 3 or more, \$2.20 each.

Sleigh Bells (Plant Pat. No. 1004). The new, popular white. Prolific and early bloomer. Long, beautifully formed buds, long stems. \$2.00 each; 3 or more, \$1.75 each.

Tallyho (Plant Pat. No. 828). All-America winner for 1949. An excellent Rose in a combination of two-tone Rose with a touch of red. Is a robust grower, free flowering, and delightfully fragrant. \$2.00 each; 3 or more, \$1.75 each.

Red Pinocchio (Plant Pat. No. 812). A velvety deep red, sometimes with traces of black. Popular in all climates. Free in bloom over a long season. Very long lasting on the bush or when cut. Grows to a height of 2 to 2½ feet. \$1.50 each; 3 or more, \$1.30 each.

Valentine (Plant Pat. No. 1029). One of the brightest Floribundas you'll find, its flowers of glowing traffic signal red; appearing in huge clusters, 2½ inch flowers. \$2.00 each; 3 or more, \$1.75 each.

Vogue (Plant Pat. No. 926). The newest in Floribundas and winner of All-America honors for 1952. Its bright, gay, coral-cherry color, its vigor and wealth of bloom will make it very popular. \$2.00 each; 3 or more, \$1.75 each.

White Pinocchio (Plant Pat. No. 1010). The flowers are a glistening white and long lasting, covered with blooms about 2½ inches in diameter. \$1.50 each; 3 or more, \$1.30 each.

Yellow Pinocchio (Plant Pat. No. 992). This new member of the Pinocchio family grows 3 feet tall; sturdy bush with great masses of 3-inch, fully double apricot-yellow blooms. \$1.50 each; 3 or more, \$1.30 each.

BAILEY'S HARDY ROSES

From The Winter Carnival City

A New Race of Hardiness in Hybrid Tea Roses
They Are Vigorous, Easy to Grow, Long Lived, Free Flowering

Cedric Adams. The eminent radio commentator, lover of Roses, has placed his name on this sturdy, large, double scarlet to carmine aristocrat of Rosedom. \$1.75 each, 3 for \$5.00.

Curly Pink. Matchless in combination of size and form of bloom, beauty of cluster; many large, two-toned pink blossoms in several stages form a gorgeous bouquet on a single stem. \$1.75 each, 3 for \$5.00.

King Boreas. Named for the Aurora Borealis, King of Minnesota Winter Sport, who loves his Roses when the long, sub-zero nights are gone. Lemon-yellow, completely double; free, abundant bloomer. A beauty. \$1.75 each, 3 for \$5.00.

Lily Pons. White, with pure yellow center; large, graceful flowers of indescribable delicacy; vigorous, free bloomer. Often a feature of gardens in the cold Northwest. \$1.75 each, 3 for \$5.00.

Queen O' The Lakes. Named for the Queen of Minnesota's aquatic sports. No diving beauty could show better fullness of grace, brilliance and elegance of form, or color more beautiful than this charming crimson queen of flowers. The queen of all the double reds. Deep velvety. \$1.75 each, 3 for \$5.00.

Shades of Autumn. An abundant and joyous expression of bicolored beauty. Many have reported that this beautiful red, yellow and blush flower is gorgeously outstanding. \$1.75 each, 3 for \$5.00.

V for Victory. Large, very double yellow flowers of good fragrance. A profuse bloomer; hardy. \$1.75 each, 3 for \$5.00.

PLANT TREES FOR COMFORT

BIRCH, Cutleaf Weeping. The drooping branches and the finely cut leaves are attractive. The white bark provides color throughout the year.

BIRCH, Paper. White Birch, or Canoe Birch. The white bark and clear yellow leaves in Fall provide showy color. Height 60 feet.

ASH, Green (White). Here is one of the most dependable trees. It is fast growing, long lived and drought resistant. It will grow well in a wide variety of soil conditions. Height 60 feet.

ASH, Mountain. An attractive ornamental, especially in late Summer, when it is covered with clusters of red berries. Height 35 feet, spread 25 feet.

ELM, American. Everyone knows the American Elm. It is a hardy, long lived tree. Height 80 to 100 feet.

ELM, Lake City. This is a grafted form of the American Elm. It is distinguished by symmetrical form and rich foliage.

HACKBERRY. Hackberry shows a remarkable tolerance to a wide variety of soil and moisture conditions. It grows rapidly but is tough and strongly branched. Height 60 to 70 feet.

LINDEN. This handsome tree is also known as the Basswood. It is hardy and grows rapidly. Bears clusters of small white and cream-colored flowers. Height 75 feet.

MAPLE, Crimson King (Plant Pat. No. 735). This beautiful ornamental is a form of the Schwedler Maple that was selected in Europe for its brilliant crimson leaves. The color is retained throughout the Summer.

MAPLE, Norway. A good tree for street or lawn specimen planting where good form and shade are needed. Reaches a height of 60 feet.

MAPLE, Silver. Here is a quick growing Maple that is suited where the more hardy and permanent trees are required. Height 75 to 100 feet.

MAPLE, Schwedler. The leaves are an attractive red during the early part of the Summer. It is best used as a specimen and should have full sunlight for greatest coloration. Height 40 to 50 feet.

MAPLE, Sugar. This Maple has an oval shape with symmetrically rounded crown. It will grow under various conditions. In Fall the leaves turn from a bright green to showy reds and yellows. Height 80 feet, spread 40 to 50 feet.

POPLAR, Lombardy. Here is a suitable tree for planting in rows. It is quick growing and hardy. Height 60 feet. Pictured on color pages.

POPLAR, Bolleana. A fast growing tree with the Lombardy habit of growth but with more color. The leaves are glossy green above and silvery white beneath. Height 60 feet, spread 6 to 8 feet.

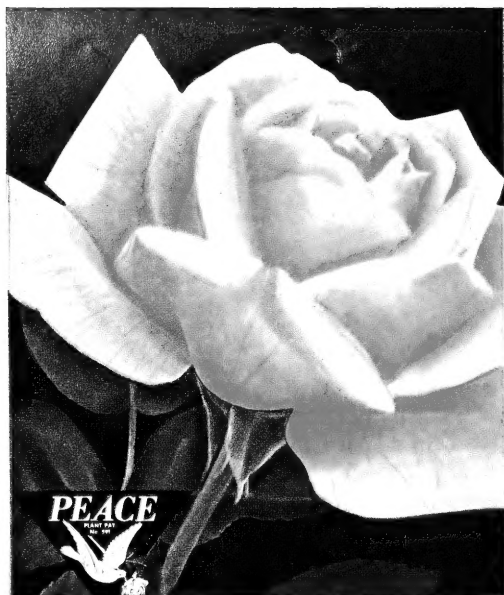

WALNUT, Black (Juglans nigra). This native tree is capable of fairly rapid growth. It offers shade, edible nuts and valuable wood. Height 75 to 100 feet, spread 50 to 60 feet.

WILLOW, Niobe Weeping. This quick growing tree is the best of the Weeping Willows. It may be used in rows three and five of the shelter belt. Height 40 feet. Pictured on front page.
